

G | **GO
GREEN**

A **TRADEiD** product

Contents

Introduction	1
Material Breakdown	2
Environmental Credentials	3

Go Green is made from recycled materials with an 85% reduction in single use plastic.

Go Green is sustainable but does not compromise print quality or durability. As technology and material options develop, we will continually look to improve and develop **Go Green**.

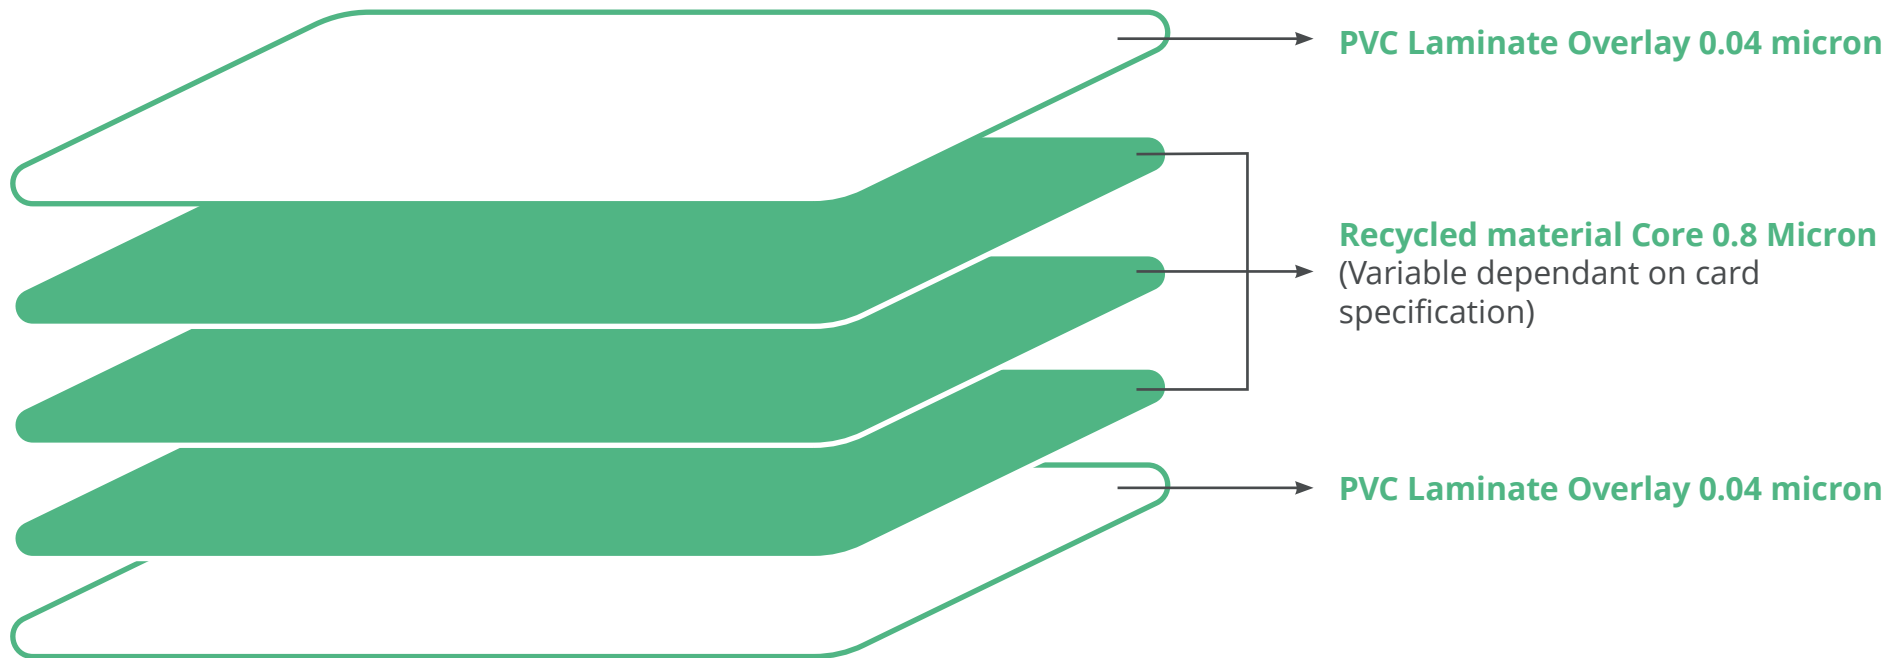

Compatible with all card printers due to the inclusion of a PVC overlay.
As per best practice, Retransfer printers are always recommended when printing onto any form of access control card.

Go Green: Unlock the Future of Sustainability.

Material Breakdown

- Recycled material
- PVC laminate overlay
- Weight 0.0059kg per card

Environmental Credentials

Go Green cards are made from post-industry recycled materials and has a lower environmental impact, whilst giving plastic a second life.

Can Go Green be Recycled?

Due to the nature of the card containing a semi-conductor chip and confidential data, we strongly advise that Go Green cards are to be disposed in a secure manner and recycled into the correct waste stream. Please contact your local authority for the most up to date guidelines at the time of recycling.
